

WELCOME

THINK  
WEINIG

**LIGNA.19**

Hanover

27–31 May 2019

Hall 27

# Welcome

to the WEINIG Group at LIGNA in Hanover.

We will be presenting perfect solutions for solid wood and panel processing to you that share an emphasis on intelligent production, integrated machine concepts and innovative operating concepts – everything from a single source. In addition, we will be exhibiting innovations offering performance levels in the entry segment that even until recently were reserved for high-end solutions. One of the highlights will be a complex WEINIG production line with 8 components, all targeted to W4.0 digital. The newly founded Automation & Digital Business Unit bundles our entire know-how relating to digital systems technology. Every reason, then, to THINK WEINIG and pay us a visit.

We wish you a pleasant journey and an enlightening visit to our stand.

Yours

Gregor Baumbusch  
Chief Executive Officer

# TIMES ARE CHANGING. AND WHAT ABOUT ME?

## THINK WEINIG

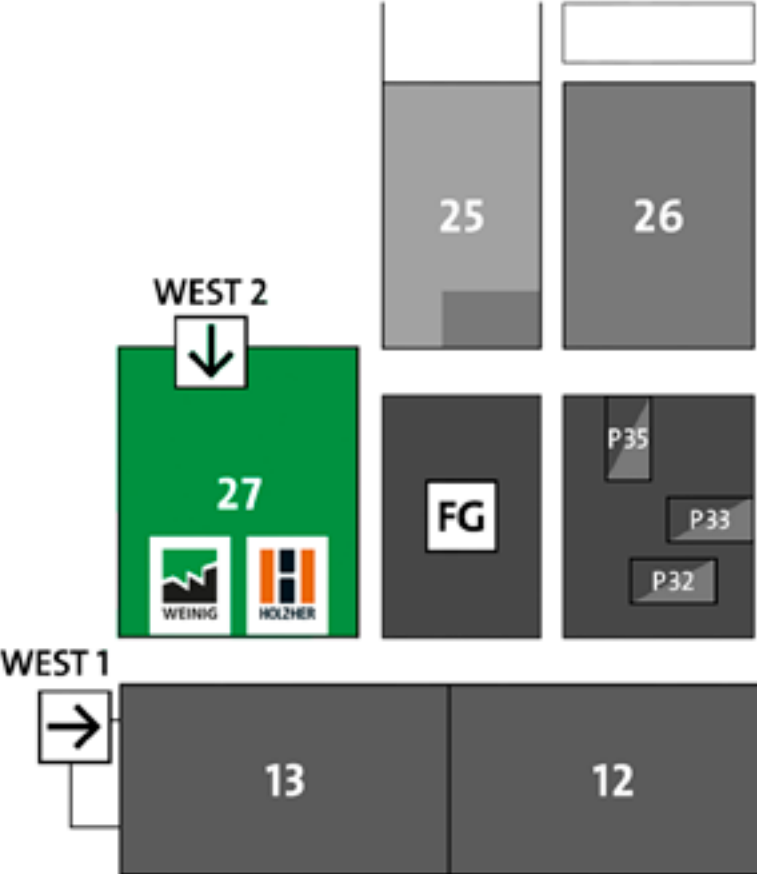

From mass production today to mass-customization tomorrow, times of great change bring new challenges daily. I need a partner who not only sells me a machine, but guides me into the future with comprehensive advice and scalable, flexible production solutions.

**WEINIG offers more.**

# Digitized systems technology

WEINIG's competence for large-scale systems is increasingly in demand on the market. At LIGNA, visitors to the stand can experience a complex production line consisting of eight interconnected WEINIG components live in action. In daily demonstrations, the complete processing line from the raw material to the end product will be shown. This system uses robot technology and WEINIG scanner technology. All components are centrally controlled via the new **WEINIG Control Suite**. In Hanover, semi-finished products will be manufactured live as instructed by the Central System Control unit and will then be further processed directly in various applications at other stations of the WEINIG stand, for example in window production with the Conturex.

# THINK WEINIG

## **WEINIG Automation & Digital Business**

The newly founded Automation & Digital Business Unit bundles WEINIG expertise in the field of W4.0 digital. The current version of the WEINIG App Suite with extended functionality for the customer will be presented in Hanover. The various functions are even more adapted to individual customer needs – its modular structure and secure data communication via the WEINIG Cloud or cloud-based Siemens Mindsphere platform create a powerful overall package.

## **WEINIG Concept / System Solutions**

The focus of WEINIG Concept at LIGNA 2019 is CLT competence. Current customer projects will be presented and individual process steps will be integrated in the large-scale WEINIG system at the stand.

## **WEINIG Services**

WEINIG is a complete supplier – and offers an extensive service program. Local specialists provide advice on training, finance, pre-owned machines, service, preventive maintenance and spare parts supply, among other things.
